## HOT FILLING

Hotfilling to the product is suitable, but in case of hotfilling, packaging becomes more flexible, immediately after hot filling, the heat must be considered in the case of stacking. To reach the appropriate stacking strength of the plastic packaging, the product and packaging needs to cool down.

## COLD TEMPERATURE

Suitable for deep freezers

## STACKING ( FULL)

Stacking depends on many variables, it is recommended that the users make their own testing on issues such as stacking over and over, transportation, etc.
